EDUCATION

R. C. Patel Institute of Technology, Shirpur

August 2023 – Present

B.Tech in Computer Science and Engineering (Data Science)

CGPA: 8.85/10 (Till 5th Semester)

- Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Natural Language Processing, Machine Learning, Web Development, Software Engineering

EXPERIENCE

Infosys Springboard

October 2025 – December 2025

Artificial Intelligence Intern

Remote

- Developed an AI-powered Regulatory Compliance Checker for legal contracts, analyzing documents and recommending GDPR/HIPAA-compliant amendments using Natural Language Processing (NLP) techniques.
- Built a Retrieval-Augmented Generation (RAG) based chatbot using vector-based document search for intelligent querying of contract clauses, improving query accuracy via semantic similarity.
- Implemented automated PDF generation with highlighted amendments and integrated email notification workflows for compliance reporting, reducing manual review effort.
- Designed and deployed an interactive Streamlit dashboard for contract compliance analysis and document review workflows, enabling real-time document processing for end users.

PROJECTS

Smart Personal Expense Tracker | *React.js, Node.js, Express.js, MongoDB, LLM* | [GitHub](#) | [Live](#) 2025

- Implemented secure user authentication using bcrypt.js for password hashing and protection of sensitive financial data across a full-stack MERN application.
- Developed RESTful APIs with full CRUD (Create, Read, Update, Delete) operations to manage income and expense records efficiently, ensuring scalable backend architecture.
- Built a financial analytics dashboard displaying real-time income, expenses, and AI-driven spending insights using data visualization techniques.
- Integrated an LLM-powered AI chatbot for smart, personalized financial guidance and budget recommendations, improving user engagement and financial decision-making.

Vehicle Rental Website | *HTML, CSS, Node.js, Express.js, MongoDB, Bootstrap* | [GitHub](#) | [Live](#) 2025

- Built a full-stack MERN application with complete CRUD operations for vehicle listings and booking management, supporting end-to-end rental workflows.
- Implemented JSON Web Token (JWT) based authentication, modular middleware, and RESTful APIs for a secure, scalable, and maintainable backend architecture.
- Developed a fully responsive user interface with seamless frontend-backend integration via API calls and efficient state management, ensuring cross-device compatibility.

TECHNICAL SKILLS

Languages: C, Java, Python, SQL

Web Development: MERN Stack (MongoDB, Express.js, React.js, Node.js), HTML5, CSS3, Bootstrap, REST API, JWT Authentication

AI/ML & Data Science: Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Large Language Models (LLMs), Supervised Learning, Streamlit, Jupyter Notebook, Google Colab, Data Visualization

Tools & Platforms: Git, GitHub, VS Code, Eclipse, Linux

Soft Skills: Leadership, Time Management, Team Collaboration, Communication, Problem Solving

ACHIEVEMENTS & PARTICIPATION

CodeChef: 2-Star rating (max 1576), solved 1000+ problems, maintained a 250+ day streak in competitive programming.

LeetCode: Solved 200+ algorithmic problems and earned the 100 Days Coding Badge for consistent practice.

Smart India Hackathon (SIH) 2024 & 2025: Qualified Institutional Round and nominated for Round 3 both years.

RCPIT Converges'25 & '26: Won 1st Prize in two technical competitions, demonstrating innovation and technical excellence.

CERTIFICATIONS

NPTEL – Natural Language Processing | IIT Kharagpur

Python Essential 1 & 2 | Cisco Networking Academy

Data Science Professional Certification | Oracle University

Database and SQL | Infosys Springboard

Programming Skills Enhancement | CodeChef
